3                   **SEARCH GRANTS UNDER FOREST AND**  
4                   **RANGELAND RENEWABLE RESOURCES RE-**  
5                   **SEARCH ACT OF 1978.**

6           (a) FINDINGS.—Section 2 of the Forest and Range-  
7 land Renewable Resources Research Act of 1978 (16  
8 U.S.C. 1641) is amended by striking “SEC. 2.” and sub-  
9 section (a) and inserting the following:

10   **“SEC. 2. FINDINGS AND PURPOSE.**

11           “(a) FINDINGS.—Congress finds the following:

12                   “(1) Forests and forest resources are of strate-  
13                   gic economic and ecological importance to the Unit-  
14                   ed States, and the Federal Government has an im-  
15                   portant and substantial role in ensuring the contin-  
16                   ued health, productivity, and sustainability of the  
17                   Nation’s forests.

18                   “(2) Over 75 percent of the productive commer-  
19                   cial forest land in the United States is in private  
20                   ownership, with some 60 percent owned by small  
21                   nonindustrial private owners. These 10,000,000 non-  
22                   industrial private owners are critical to providing  
23                   both commodity and noncommodity values to the  
24                   citizens of the United States.

1           “(3) The National Forest System manages only  
2       17 percent of the Nation’s commercial timberlands,  
3       with over half of the standing softwoods inventory  
4       located on those lands. Dramatic changes in Federal  
5       agency policy during the early 1990’s have signifi-  
6       cantly curtailed the management of this vast timber  
7       resource, causing abrupt shifts in the supply of tim-  
8       ber from public to private ownership. As a result of  
9       these shifts in supply, some 60 percent of total wood  
10      production in the United States is now coming from  
11      private forest lands in the southern United States.

12           “(4) At the same time that pressures are build-  
13      ing for the removal of even more land from commer-  
14      cial production, the Federal Government is signifi-  
15      cantly reducing its commitment to productivity-relat-  
16      ed forestry research, which is critically needed by the  
17      private sector to sustainably manage remaining  
18      available timber resources.

19           “(5) Uncertainty over the availability of the  
20      United States timber supply, increasing regulatory  
21      burdens, and the lack of Federal Government sup-  
22      port for research is causing domestic wood and  
23      paper producers to move outside the United States  
24      to find reliable sources of wood supplies, which in  
25      turn results in a worsening of the United States

1 trade balance, the loss of employment and infra-  
2 structure investments, and an increased risk of in-  
3 festations of exotic pests and diseases from imported  
4 wood products.

5 “(6) Wood and paper producers in the United  
6 States are being challenged not only by shifts in  
7 Government policy, but also by international com-  
8 petition from tropical countries where growth rates  
9 of trees far exceed those in the United States. Wood  
10 production per acre will need to quadruple from  
11 1996 levels for the United States forestry sector to  
12 remain internationally competitive on an ever de-  
13 creasing forest land base.”.

14 (b) HIGH PRIORITY FORESTRY RESEARCH AND EDU-  
15 CATION.—Subsection (d) of section 3 of the Forest and  
16 Rangeland Renewable Resources Research Act of 1978  
17 (16 U.S.C. 1642) is amended to read as follows:

18 “(d) HIGH PRIORITY FORESTRY RESEARCH AND  
19 EDUCATION.—The Secretary may conduct, support, and  
20 cooperate in forestry research and education that is of the  
21 highest priority to the United States and users of public  
22 and private forest lands in the United States. Such re-  
23 search and education priorities were comprehensively ad-  
24 dressed in the report of the National Research Council of  
25 the National Academy of Sciences entitled ‘Forestry Re-

1 search: A Mandate for Change’, dated \_\_\_\_, and include  
 2 the following:

3 “(1) The biology of forest organisms.

4 “(2) Ecosystem function and management.

5 “(3) Human-forest interactions.

6 “(4) Wood as a raw material.

7 “(5) International trade, competition, and co-  
 8 operation.”.

9 (c) FORESTRY COMPETITIVE RESEARCH GRANTS.—  
 10 Section 5 of the Forest and Rangeland Renewable Re-  
 11 sources Research Act of 1978 (16 U.S.C. 16442) is  
 12 amended—

13 (1) by striking the section heading and “SEC.  
 14 5.” and inserting the following:

15 **“SEC. 5. FORESTRY COMPETITIVE RESEARCH GRANTS.**

16 “(a) COMPETITIVE GRANT AUTHORITY.—”; and

17 (2) by adding at the end the following new sub-  
 18 section:

19 “(b) EMPHASIS ON CERTAIN HIGH PRIORITY FOR-  
 20 ESTRY RESEARCH.—The Secretary may use up to five  
 21 percent of the amounts made available for research grants  
 22 under subsection (a) to make competitive grants in the  
 23 five high priority forestry research areas identified in sec-  
 24 tion 3(d). In making such grants, the Secretary shall give  
 25 priority to research proposals in which—

1 “(1) the proposed research will be collaborative  
 2 research organized through a center of scientific ex-  
 3 cellence;

4 “(2) the applicant agrees to provide matching  
 5 funds (in the form of direct funding, in-kind sup-  
 6 port, or other support) in an amount equal to not  
 7 less than 50 percent of the grant amount; and

8 “(3) the proposed research will be conducted as  
 9 part of an existing private and public partnership or  
 10 cooperative research effort and involves several inter-  
 11 ested research partners.”.
